Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 October 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 5 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
2. In claims 5 and 12, applicant's recitation of "the spacer is a shim, bushing, spring, or any other similar device" is unclear rendering the claim indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-13 and 19-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Folsom (US Patent 5,423,183).

Folsom teaches an assembly similar to applicant's including:

- A first and second pump/motor (20, 29)
- A first and second drive plate assembly (65, 36)
- A common shaft (21)

Art Unit: 3618

- The plate assemblies (65, 36) are in hard contact with a first and second end of the shaft (21), respectively, in a plane perpendicular to the longitudinal axis of the shaft (21)
- The plate assemblies and shaft acting as a solid element when under compression to cancel axial loads generated by the pump/motors (20, 29) through the shaft (21)
- A first and second annular bearing (62, 84)
- A torque transferring assembly/unit
- Re claims 4-6, see column 6, lines 19-54. Note, spring spacers and the gap shown in Figures 1 and 1a between plate (65) and bearings (62, 84)

Re claims 25 and 27, the method of operating a plurality of pump motors and the method of improving the efficiency of two or more opposing pump/motors is inherently disclosed. The rationale for this inherency is that the prior art device, in its normal and usual operation, would necessarily perform the claimed method. See MPEP 211.02.

Allowable Subject Matter

4. Claims 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Folsom et al. shows a hydraulic machine.

Hayashi et al. shows a swashplate assembly.
